DAS MÖBEL – SO SMART WIE DU

# life & work free

THE HEIGHT-ADJUSTABLE  
FLOATING DESK

Space is often one of the most precious things in our lives. Whether that's at home, in the office or in a hotel. Our live & work free desk is designed to help people make the most of living and working in small spaces. This is because our live & work free is a space-saving, fold-away floating desk designed to meet all home office needs. Mounted to the wall by a ladder-type frame, it takes up little to no space when folded up and turns into an ergonomic sitting and standing desk for use as a home office in no time at all.

## Inconspicuous on the outside, multi-functional miracle on the inside

Attractive design, functional and versatile. This innovative desk has been specifically designed for the smallest of spaces and takes but a moment to turn from a full-on home office into a neat and attractive shelf – and all of that on a footprint no larger than a big cardboard box. Simply pull open at the front, put on your laptop, plug in and off you go.

### The live & work free is the perfect desk for:

- Children or teens' rooms
- Hotels, offices and meeting rooms
- Schools, colleges, universities
- Home offices
- Microapartments
- Student halls and apartments

## Some of our highlights...

Integrated and anti-glare LEDs

Ample storage spaces

Light switch & USB / USB C

Multi-plug with magnetic cover
